How many people graduate from high school and even college within knowing the basics of financial literacy - deciphering credit ratings, maintaining and balancing a bank account, getting through college with a minimum of student debt, making the most of that first job and, eventually, buying a home and planning for retirement? Orman strives to close this "financial illiteracy" gap by providing invaluable info for those just starting out - although I found plenty of information I needed to know as well - and I'm well outside the "young and broke" range she seems to be targeting. The info is not only cutting edge but many of the websites have NOT appeared in other books. One example of how new the info is: Orman notes the recent changes in credit rules noting that EVERYONE has access to a FREE credit report once a year. Because she knows younger adults may be intimidated by a ton of financial info, Orman (wisely) delivers her advice in innovative, user-friendly ways. Each page is short, easy to read and yet chock full of info. In short, she doesn't waste words. Each section is launched with a Lowdown on what will be covered in the chapter and there is a quick summary at the end with checklists to make sure readers know what they shouldn't

have missed. A Glossary at the back of the book explains some of the more complex terms. Important website resources and key terms are boldfaced in green, a great asset when looking for important info. Reading this book could help young people avoid many pitfalls, since Orman covers the basics such as:

- * Understanding that all important credit rating and deciphering your FICO score
- * Making a small paycheck stretch as far as possible while maximizing opportunities for career advancement.
